Professional Experience

2022 - present

Da Nang, Viet Nam

PHP WEBSITE PROGRAMMER

- **Building a Laravel Website following MVC Pattern:** I organized the project using MVC architecture, effectively separating data logic from user interface.
- **Developing Server APIs using PHP:** These APIs enabled smooth communication between mobile apps and web platforms via HTTP requests. I prioritized security and performance in API design.
- **Handling and Interacting with Databases:** I designed databases, formed tables, and executed queries to store and retrieve vital app data.

2022 - present

VUEJS PROGRAMMER

- **Applying Bootstrap Framework for Interface Design:** Building a web interface using the Bootstrap framework in conjunction with HTML and CSS is a popular and effective approach.
- **Handling Data Rendering with Vue.js and Axios:** Apply Axios and Vue.js to communicate with an API and subsequently display data on the website in a flexible and interactive manner.
